# Agricultural Commodity Metric Conversion Guide

As the world's leading and most diverse derivatives marketplace, CME Group ([cmegroup.com](http://cmegroup.com)) is where the world comes to manage risk. CME Group exchanges offer the widest range of global benchmark products across all major asset classes, including futures and options based on interest rates, equity indexes, foreign exchange, energy, agricultural commodities, metals, weather and real estate. CME Group brings buyers and sellers together through its CME Globex electronic trading platform and its trading facilities in New York and Chicago. CME Group also operates CME Clearing, one of the largest central counterparty clearing services in the world, which provides clearing and settlement services for exchange-traded contracts, as well as for over-the-counter derivatives transactions through CME ClearPort.

## AGRICULTURAL PRODUCTS

MORE AGRICULTURAL FUTURES AND  
OPTIONS. GREATER OPPORTUNITY.

CME Group offers the widest range of agricultural derivatives of any U.S. exchange, with trading available on a range of grains, livestock, oilseed, dairy, lumber and other products. Representing the staples of everyday life, these products offer you liquidity, transparent pricing and extraordinary opportunities in a regulated centralized marketplace with equal access to all participants.

# PASSPORT TO THE WORLD

---

CME Group has developed this handy pocket guide to help you in converting metric tons to U.S. measurements.

## How to Use this Guide Example:

To convert 11,000 metric tons of corn to bushels, just add the appropriate conversion listed in the table on Page 4.

10,000 metric tons = 393,683 bushels

+ 1,000 metric tons = 39,368 bushels

11,000 metric tons = 433,051 bushels

We have also included price conversion tables equating the dollar value of a given commodity to the dollar value in metric tons. We hope you find these conversion tables useful in meeting your hedging needs.

**Note:** There may be a slight discrepancy between the charts and formulas as a result of rounding.

# CME GROUP

## AGRICULTURAL PRODUCTS

---

Prices of these primary products are subject to factors that are difficult or impossible to control, such as weather, disease and political decisions. In addition, they are also short-term fixed supply products offered in a context of growing worldwide demand and global economic expansion. As such, CME Group Agricultural products serve commodity producers and users seeking risk management and hedging tools, alongside funds and other traders looking to capitalize on the extraordinary opportunities these markets offer.

CME Group offers the widest range of agricultural futures and options of any U.S. exchange, with trading available on the following products:

**Grains and Oilseeds**

**Dairy**

**Livestock**

**Commodity Indexes**

**Lumber**

**Fertilizer**

**For more information about CME  
Group Agricultural products, visit  
[cmegroup.com/agriculture](https://cmegroup.com/agriculture).**

---

Crude Palm Oil futures are listed with and subject to the rules and regulations of CME. All other Grain and Oilseed futures are listed with and subject to the rules and regulations of the CBOT.

Livestock, Dairy and Lumber futures are listed with and subject to the rules and regulations of the CME.

Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles. And only a portion of those funds should be devoted to any one trade because they cannot expect to profit on every trade. All examples in this brochure are hypothetical situations, used for explanation purposes only, and should not be considered investment advice or the results of actual market experience.
